

## **Solo Device Houses GPS System and Portable Media Center All In One**

November 30, 2005 – Dream'eo, manufacturer of mobile digital entertainment systems, introduces Solo, the newest device in its product line. Solo is a pocket-sized portable media player and Global Positioning System (GPS) all in one.

Solo's innovative technology allows consumers to utilize multiple functions in one lightweight player. With Solo, users can enjoy their favorite movies, television shows, home videos, music and digital pictures. Solo also functions as a GPS system to navigate users to their destinations. In addition, Solo has portable file storage capacity with its mobile 20G hard disk drive (HDD).

"Solo delivers everything you need to stay entertained, organized and en route to your destination," said Simon He, CEO of Catronics. "Not only does Solo allow you to store, watch and listen your favorite media in one pocket-sized player, Solo is furnished with a Global Positioning System with automatic routing, turn-by-turn voice direction, and a detailed map for the entire USA and Canada with 1.6 millions Points of Interests (POIs). And Solo can also be used as a mobile hard disk drive for additional file storage."

Solo Features:

NavMate GPS System featuring turn-by-turn voice direction, a guide with automatic routing, and a detailed map of the United States (including Hawaii and Alaska), Canada, Puerto Rico and the U.S. Virgin Islands.

View pictures/files or watch videos on the 3.5 inch, 1,6M colors, touch panel LCD screen

Store and listen to music in MP3, WMA and WAV formats

Store more than 20 hours of video, 5,000 hours of music or 10,000 pictures

Audio message recording and playback

Store files on the mobile hard disk drive (HDD)

Solo by Dream'eo is available for \$999 at [www.mwave.com](http://www.mwave.com).
